

High-Flow Liquid Dispenser, 300-500 Lpm

This dispenser is designed for high-flow dispensing of liquids at 300 to 500 liters per minute. It features a digital display showing weight, volume, and density.

Overview

High-Performance Liquid Dispensing

This high-flow liquid dispenser is engineered to meet the latest super-flow fueling requirements, combining design innovation with high-quality components. It provides precise measurements for weight, volume, density, and temperature, ensuring reliable operation even in harsh environmental conditions such as extreme heat, cold, humidity, or sand-prone areas. Designed for professional use, it offers a user-friendly interface and robust exterior construction for long-term durability.

Technical Specifications

Flow Rate

300 Lpm

Minimum Flow Rate

500 Lpm

Maximum Flow Rate

Measurement Parameters

Weight, Volume, Density, Temperature

Features

Key Features

- Customer-friendly operation interface
- High-precision metrology equipment
- Volume and weight flow meter options
- High-performance electronic components
- Modernized exterior design

Environmental Durability

Resistant Conditions

Extreme Cold • Extreme Heat • High Humidity • Sand-stormy Environments
