Product Overview

Precision Audio Engineering

This high-frequency speaker diaphragm is precision-engineered to deliver high-fidelity audio reproduction. Its design incorporates a lightweight, rigid dome structure that ensures accurate sound dispersion while maintaining minimal distortion. These components are specifically built for integration into professional audio equipment and high-end speaker systems where sonic clarity is paramount.

Technical Features

Key Design Features

- Lightweight rigid dome construction
- Corrugated edge design for improved performance
- Gold-plated electrical terminals
- Integrated black gasket for secure mounting

Terminal Connectivity

Connector Type	Identification
Gold-plated terminal	Red ring
Gold-plated terminal	Black ring

Applications

Professional Audio, High-End Speakers, Audio-Video Systems
