

High Frequency Uninterruptible Power Supply

This high-frequency uninterruptible power supply provides stable voltage and frequency. It utilizes double-conversion circuit design to supply pure sine wave power.

Overview

Reliable Power Protection

The CK Series Uninterruptible Power Supply (UPS) provides reliable backup power and protection for critical equipment. Designed to ensure continuous operation during power outages, voltage fluctuations, and other electrical disturbances, this system is a robust solution for maintaining uptime. Featuring advanced monitoring and control capabilities, it offers comprehensive power management for a wide range of professional applications.

Technical Specifications

Model Identifier

CKAF

Series

CK Series

Type

High Frequency Uninterruptible Power Supply

Key Features

Reliable Backup Power, Voltage Fluctuation Protection, Advanced Monitoring, Power Management
