

# High-Frequency Welded Pipe Production Mill

This industrial mill produces welded pipes using high-frequency welding technology. It is designed for high precision and efficiency in pipe manufacturing and is suitable for various industrial applications.

## Product Overview

### Industrial Precision Pipe Production

This high-frequency welded pipe mill provides a robust solution for precision metal forming and industrial manufacturing. Designed for high efficiency and consistent performance, the system supports a wide range of production scales from ZY16 to ZY610. The versatile machinery configuration makes it an essential asset for modern pipe and profile manufacturing facilities.

## Technical Specifications

### Additional Equipment

- H-BEAM steel line
- Slitting machine
- Cold roll forming machine
- Cold rolling mill
- Angle steel machine

### Model Range

ZY16, ZY20, ZY32, ZY50, ZY76, ZY114, ZY165, ZY219, ZY273, ZY325, ZY406, ZY508, ZY610
