

High-Gain Outdoor Digital TV Antenna

This high-gain outdoor TV antenna is designed for receiving digital terrestrial television signals. Its multi-element design incorporates Yagi-Uda and reflector elements for enhanced signal reception and directivity.

Product Overview

Professional Grade Digital TV Reception

This high-gain outdoor digital TV antenna is engineered for superior signal capture in terrestrial television environments. Featuring a sophisticated multi-element Yagi-Uda and reflector design, it provides exceptional directivity and strength in areas with challenging reception. Built from premium weather-resistant materials, the unit is designed for long-term reliability and high performance across both VHF and UHF bands.

Technical Specifications

Construction

Weather-resistant • Outdoor-rated

Frequency Bands

VHF, UHF

Antenna Design

Multi-element Yagi-Uda with integrated reflector

Installation

Included Hardware

Yes

Performance

Reception Capability

- High gain for weak signal areas
- Enhanced directivity
- Digital terrestrial signal support
