

High-Gain Outdoor TV Antenna with Signal Booster

This high-gain outdoor TV antenna system is designed for enhanced signal reception. It features a disc-shaped reflector and a multi-element Yagi-Uda array, along with electronic components such as an amplifier or signal booster, to improve signal quality and range.

Product Overview

High-Performance Outdoor Signal Reception

This high-gain outdoor TV antenna system is engineered to provide superior signal reception in challenging environments. Featuring a sophisticated disc-shaped reflector combined with a multi-element Yagi-Uda array, it effectively captures distant or weak broadcast signals. The included signal booster ensures clear, high-quality transmission, making it an ideal solution for remote locations or areas with significant signal interference.

Technical Specifications

Antenna Design	Yagi-Uda Array with Disc Reflector
Best For	Weak Signal Areas, Distant Broadcasts, Outdoor Installation
Signal Booster Included	Yes
Model Identifier	L-2000
