

# High-Gain Outdoor TV Antenna

This high-gain outdoor TV antenna is designed for receiving digital terrestrial television signals. It features a multi-element array for enhanced signal reception and is suitable for areas with weak signal strength.

## Product Overview

### High-Performance Signal Reception

This high-gain outdoor TV antenna is engineered for superior digital terrestrial television signal reception. Featuring a specialized multi-element array, it is specifically designed to excel in areas with weak signal strength by maximizing signal capture. The durable construction ensures long-lasting reliability and performance in demanding outdoor weather conditions.

## Technical Specifications

### Performance Metrics

**1 Digital**

Signal Type

### Array Components

- Multiple directors
- Driven element
- Reflector

## Installation and Compatibility

### Compatibility

Digital Terrestrial

### Mounting Options

Mast Mount, Pole Mount
