

High-Gain Yagi-Uda TV Antenna

This high-gain Yagi-Uda antenna is designed for receiving television signals. It features multiple director and reflector elements for enhanced signal reception and is constructed with durable materials for outdoor use.

Product Overview

High-Performance TV Reception

This high-gain Yagi-Uda antenna is precision-engineered to provide superior signal capture for both digital and analog television broadcasts. Utilizing a multi-director element configuration and a robust reflector, it delivers exceptional forward gain and an optimized front-to-back ratio for clear, stable reception. Designed for longevity, the unit features durable construction suitable for harsh outdoor environments.

Technical Specifications

Key Performance Metrics

1 Optimized
High-Gain Capability

Antenna Design	Yagi-Uda
Signal Compatibility	Digital TV, Analog TV

Installation and Durability

Recommended Usage

Outdoor • Roof-mount • Mast-mount

Includes Mounting Hardware	Yes
