

High Intensity Discharge Flood Light

This high intensity discharge flood light is designed for powerful and efficient outdoor illumination. The robust housing ensures durability and weather resistance in various environmental conditions.

Product Overview

High Intensity Discharge (HID) Flood Light

The High Intensity Discharge (HID) flood light is engineered for demanding outdoor applications that require powerful, efficient illumination. Featuring a robust, weather-resistant housing, this unit ensures reliable performance across diverse environmental conditions. Its advanced reflector design maximizes light output and distribution, making it an ideal choice for security lighting, architectural highlighting, and general wide-area illumination.

Technical Specifications

Light Source Type	High Intensity Discharge (HID)
Suitable Applications	Security Lighting, Architectural Illumination, Outdoor Area Lighting

Construction & Durability

Housing Features

- Robust construction
- Weather-resistant design
- Engineered reflector for maximum distribution
