

High-Intensity Discharge Floodlight for Mining

This high-intensity discharge (HID) floodlight is designed for area lighting in demanding environments. It features a robust housing for protection against impacts and weather.

Overview

High-Intensity Illumination for Demanding Environments

This high-intensity discharge (HID) floodlight is engineered specifically for area lighting in the most challenging industrial settings. Featuring a robust, impact-resistant housing, it is built to withstand harsh weather conditions and demanding operational environments. It serves as an essential tool for mining, construction, and heavy industrial applications, ensuring reliable illumination to enhance both safety and operational productivity.

Technical Specifications

Lighting Technology	High-Intensity Discharge (HID)
Suitable Applications	Mining, Construction, Industrial

Design & Durability

Housing Features

Robust Housing • Impact Resistant • Weather Resistant
