

High-Intensity Discharge Lamp for Professional Lighting

This high-intensity discharge (HID) lamp is designed for professional lighting applications. It features a tubular arc tube enclosed in a clear outer bulb and requires a ballast for proper operation.

Product Overview

Professional High-Intensity Lighting Solution

This high-intensity discharge (HID) lamp is engineered specifically for demanding professional lighting environments. Featuring a robust tubular arc tube enclosed in a clear outer bulb, it delivers exceptional light output and superior efficiency. Its broad light spectrum makes it a versatile choice for complex industrial, commercial, and horticultural lighting applications.

Technical Specifications

Design Type	Tubular arc tube with clear outer bulb
Operating Requirement	Requires compatible external ballast

Applications

Primary Applications	Industrial, Commercial, Horticultural
----------------------	---------------------------------------

Performance

Performance Features

- High light output efficiency
- Broad spectral coverage
- Professional-grade durability
