

High-Intensity Discharge Lamp for Specialized Lighting

This high-intensity discharge (HID) lamp features a tubular clear glass envelope. It is designed for specialized lighting applications and incorporates a threaded base for secure mounting and electrical connection.

Product Overview

High-Performance HID Solution

This high-intensity discharge (HID) lamp is engineered for demanding specialized lighting applications where reliability and brightness are critical. Featuring a durable tubular clear glass envelope, it provides consistent output for industrial, commercial, and outdoor settings. The integrated threaded base ensures a secure and stable connection for long-term operational integrity.

Technical Specifications

Lamp Technology	High-Intensity Discharge (HID)
Envelope Material	Clear Glass
Base Type	Threaded Base

Features

Design Advantages

- Optimized internal electrode structure
- High-efficiency discharge tube
- Tubular shape for specialized light distribution
- Rugged construction for professional environments

Common Applications	Industrial Lighting, Commercial Lighting, Outdoor Lighting
