

High-Intensity Discharge Lighting Fixture for Tennis Courts

This is a high-intensity discharge (HID) lighting fixture designed for illuminating tennis courts and other large outdoor areas. The fixture features a durable enclosure and a highly reflective internal surface for efficient light distribution.

Product Overview

Professional Sports Lighting Solution

This high-intensity discharge lighting fixture is engineered specifically for the demanding requirements of tennis courts and large-scale outdoor sports facilities. The design utilizes a robust, durable enclosure paired with a highly reflective internal surface to ensure maximum light output and efficient distribution across the playing area. It provides a reliable and powerful illumination solution for both professional and recreational sports environments.
