

High-Intensity Discharge Power Light

This high-intensity discharge (HID) power light is designed for demanding applications. It features a robust construction for durability in harsh environments and provides a powerful, focused beam for long-range visibility.

Overview

High-Performance Illumination

This high-intensity discharge (HID) power light is engineered for demanding professional applications. Designed with robust construction to withstand harsh environments, it provides a powerful, focused beam essential for long-range visibility. Its weather-resistant build and ergonomic handle make it a reliable tool for search and rescue operations, industrial inspections, and intensive outdoor activities.

Technical Specifications

Lighting Technology	High-Intensity Discharge (HID)
Design Features	Weather-resistant, Ergonomic handle, Robust construction, Focused beam

Applications

Primary Use Cases

- Search and rescue
- Industrial inspection
- Outdoor activities
