

High-Intensity Illumination Bulb with Blue Rod Support

This is a specialized lighting component featuring a compact design with a cylindrical base and a complex glass bulb assembly. It is designed for specialized applications requiring high-intensity illumination.

Product Overview

High-Intensity Illumination Bulb

This specialized HIX light is engineered for demanding applications requiring high-intensity illumination. Featuring a compact design, it incorporates a sophisticated glass bulb assembly with internal filaments and a distinct blue rod support structure. The integrated metallic flange ensures both secure mounting and reliable electrical connectivity for professional use.

Technical Specifications

Design Type	Cylindrical base with glass bulb assembly
Key Features	High-Intensity, Blue Rod Support, Metallic Flange, Compact Design
Mounting	Metallic flange
