

High-Intensity LED Indicator Light

This high-intensity LED light is designed for various applications, including emergency and security lighting. Its robust design ensures longevity and resistance to environmental factors.

Product Overview

High-Intensity LED Indicator Light

The LTD76 is a high-intensity LED light engineered for demanding applications requiring reliable visibility. Designed with a robust construction, this unit provides consistent illumination suitable for emergency and security lighting systems. Its durable build ensures longevity and resistance to environmental factors, making it an ideal choice for critical safety installations.

Technical Specifications

Model	LTD76
Technology	LED

Key Features

Durability

Robust Design • Environmental Resistant

Primary Applications

Emergency Lighting, Security Systems, Industrial Signaling
