

# High-Intensity LED Tunnel Light

This tunnel light provides high-intensity illumination for enclosed spaces. Its robust housing protects against environmental factors, while the high-performance reflector ensures efficient light distribution.

## Product Overview

### Professional Tunnel Illumination

The ZS001 High-Intensity LED Tunnel Light is engineered specifically for enclosed environments such as tunnels and underpasses. It features a robust, durable housing designed to withstand harsh environmental factors while providing consistent, reliable illumination. With its high-performance reflector technology, the fixture ensures optimal light distribution to enhance visibility and safety for all tunnel users.

## Technical Specifications

### Core Features

- High-intensity LED output
- Robust environmental protection housing
- High-performance light distribution reflector
- Optimized for safety and security

### Target Applications

Tunnels, Underpasses, Enclosed Spaces
