

High-Intensity LED Work Light

This high-intensity LED work light provides enhanced brightness and wide-angle illumination through its circular LED array. Its robust design ensures durability and resistance to vibration, making it suitable for off-road vehicles, construction, and agriculture.

Product Overview

High-Intensity LED Work Light

This high-intensity LED work light features a circular array of multiple LEDs, engineered to deliver superior brightness and wide-angle illumination. Constructed for rugged applications, the unit offers reliable performance in demanding environments while resisting vibration and impact. Its versatile design includes an adjustable mounting bracket, making it an ideal lighting solution for off-road vehicles, construction equipment, and agricultural machinery.

Performance

Key Capabilities

High-Intensity LED, Wide-Angle Illumination, Vibration Resistant, Impact Resistant

Compatibility

Target Applications

- Off-road vehicles
- Construction equipment
- Agricultural machinery
- Heavy-duty applications

Mounting

Mounting Features

Adjustable bracket • Versatile positioning • Secure attachment
