

High-Intensity LED Work Light

This is a high-intensity LED work light with multiple LED emitters and magnifying lenses. It is designed with a black frame and a clear, grid-like protective cover for robust performance.

Product Overview

High-Intensity Industrial Illumination

This high-intensity LED work light is engineered for demanding professional environments where visibility and durability are paramount. Featuring a specialized square array of multiple individual LED emitters equipped with magnifying lenses, it delivers superior light output and focused illumination. Encased in a rugged black housing with a clear, grid-protected cover, this unit is designed to withstand harsh operating conditions.

Technical Specifications

Key Performance Attributes

- High-intensity output
- Magnifying lens optics
- Impact-resistant enclosure
- Engineered for industrial environments

Light Emitter Design

Square LED array with integrated magnifying lenses

Construction

Black housing, Grid protective cover
