Product Overview

High-Intensity LED Work Light

This high-intensity LED work light is engineered to provide superior illumination with a longer lighting distance and wider coverage area. Designed for durability and stability in demanding environments, it serves as an excellent lighting solution for off-road vehicles, construction equipment, and agricultural machinery. Its robust construction and easy installation process make it a reliable choice for professional industrial and outdoor applications.

Key Features

Advantages

- Long life time
- Stable and durable construction
- High brightness output
- Easy installation (direct replacement)
- Excellent waterproof rating

Ideal Applications

Off-road vehicles, Construction equipment, Agricultural machinery, Industrial lighting, Outdoor applications

Design & Build

Housing Design

Square housing with grid-pattern LED emitters

Cooling System

Robust integrated heat sink for efficient thermal management

Mounting

Adjustable mounting bracket for flexible positioning and secure attachment
