Overview

Professional High-Leverage Bolt Cutter

This high-leverage bolt cutter is engineered for demanding construction, industrial, and maintenance environments. Featuring drop-forged blades made from high-quality carbon steel, the tool is built for durability and precision. The induction-quenched cutting edges provide exceptional hardness, ensuring reliable performance when cutting bolts, chain, threaded rods, and other metal materials.

Technical Specifications

Blade Material	High-quality carbon steel
Cutting Edge Hardness	61 HRC
Cutting Ability	d 3BIRC
Construction Features	Drop forged, Heat treated body, Induction quenched edges, Adjustable blades
