

# High-Leverage Bolt Cutter

This bolt cutter is designed for cutting bolts, rods and other metal materials. It features hardened steel blades for durability and precise cutting.

## Overview

### High-Leverage Bolt Cutter

This high-leverage bolt cutter is engineered for demanding tasks, including cutting bolts, rods, and various metal materials. It features hardened steel blades that ensure long-lasting durability and precise cutting performance. The ergonomic handles are designed to provide a comfortable grip while significantly reducing user fatigue during extended use, making it an ideal tool for industrial, construction, and maintenance environments.

## Technical Specifications

### Cutting Capacity

**450 mm**

Max Cutting Diameter

<b>Blade Material</b>	Hardened Steel
-----------------------	----------------

## Features

### Key Features

- High-leverage design for increased cutting force
- Hardened steel blades for durability
- Ergonomic handle design
- Reduced user fatigue

## Applications

<b>Suitable Applications</b>	Industrial, Construction, Maintenance
