

# High-Leverage Bolt Cutter

This bolt cutter is designed for cutting bolts, chain, and threaded rod. It features hardened alloy steel jaws and ergonomic handles.

## Product Overview

### Professional High-Leverage Cutting

This high-leverage bolt cutter is engineered for demanding industrial and construction tasks. Featuring drop-forged chrome vanadium steel jaws hardened to HRC 58-60, it delivers exceptional durability and long-lasting cutting performance. The compound action mechanism, combined with sturdy tubular handles and ergonomic rubber grips, ensures efficient cutting of bolts, rods, rivets, and chains with minimal user effort.

## Technical Specifications

Jaw Material	Drop forged chrome vanadium steel
Jaw Hardness	60 HRC
Overall Length	300 mm
Length (Inches)	12 in

## Design Features

Handle Construction	Tubular steel with rubber grips
Suitable Applications	Bolts, Rods, Rivets, Chain
