

# High-Leverage Bolt Cutters

These bolt cutters are designed for cutting bolts, rods, and other metal materials. They feature hardened steel jaws, ergonomic handles, and a compound action mechanism for increased cutting power.

## Product Overview

### High-Leverage Bolt Cutters

These high-leverage bolt cutters are engineered for cutting bolts, rods, and various metal materials efficiently. Featuring hardened steel jaws, they ensure durability and precision during heavy-duty tasks. The ergonomic handles provide a comfortable grip to reduce fatigue, while the integrated compound action mechanism significantly increases cutting power for demanding applications in construction, maintenance, and repair.

## Technical Specifications

Mechanism Type	Compound Action
Jaw Material	Hardened Steel

## Key Features

Key Features	High Leverage, Compound Action, Hardened Steel Jaws, Ergonomic Handles, Precision Cutting
--------------	---

## Applications

### Suitable Applications

- Construction
- Maintenance
- Repair Work
