

High-Leverage Bolt Cutters

These bolt cutters are designed for cutting bolts, chains, padlocks, threaded rods, and wire. They feature hardened alloy steel jaws and comfortable non-slip grips.

Overview

Professional High-Leverage Bolt Cutters

These high-leverage bolt cutters are engineered for heavy-duty cutting tasks, including bolts, chains, padlocks, threaded rods, and wire. Featuring hardened alloy steel jaws, they provide maximum cutting power and long-lasting durability for demanding environments. Designed with user comfort in mind, the non-slip grips ensure enhanced control and reduced fatigue during extended use, making them an essential tool for construction, industrial, and maintenance applications.

Technical Specifications

Key Features

- High-leverage design
- Hardened alloy steel jaws
- Non-slip comfort grips
- Precision-engineered pivot mechanism

Ideal Applications

Construction • Industrial • Maintenance

Cutting Applications

Bolts, Chains, Padlocks, Threaded Rods, Wire

Jaw Material

Hardened Alloy Steel
