

High Leverage Bolt Cutters

These bolt cutters are designed for cutting bolts, rods and other metal materials. The tool features hardened steel jaws and ergonomic handles.

Product Overview

High-Leverage Bolt Cutters

These high-leverage bolt cutters are engineered for heavy-duty cutting tasks involving bolts, rods, and various metal materials. They feature precision-hardened steel jaws that ensure durability and clean cuts, supported by a compound action mechanism that maximizes cutting force. Designed with ergonomics in mind, the handles provide a comfortable grip to help reduce user fatigue during extended use in construction, maintenance, and repair environments.

Technical Specifications

Key Features

- High-leverage design for increased power
- Hardened steel jaws for durability
- Ergonomic handle grips
- Compound action mechanism

Mechanism Type	Compound action
Jaw Material	Hardened steel
Suitable Applications	Construction, Maintenance, Repair, Metalworking
