

High Leverage Cable Cutter

This high leverage cable cutter is designed for cutting copper and aluminum cables with ease. Its compound cutting action requires less force, reducing user fatigue.

Product Overview

Professional High Leverage Cable Cutter

This high leverage cable cutter is engineered to provide superior cutting efficiency for both copper and aluminum cables. Featuring a compound cutting mechanism, it significantly reduces the force required by the user, thereby minimizing fatigue during repetitive tasks. With precision-ground blades and ergonomic, high-grip handles, this tool ensures clean cuts and enhanced safety for demanding electrical and construction environments.

Performance Metrics

Material Compatibility	Copper, Aluminum
Mechanism Type	Compound cutting action

Design Features

Ergonomics	Ergonomic high-grip handles
Blade Finish	Precision-ground

Applications

Industry Applications

- Electrical installations
- Construction
- Cable maintenance
