

High-Leverage Combination Pliers

These combination pliers feature hardened cutting edges for durability and efficient cutting. Ergonomic handles provide a comfortable grip, reducing hand fatigue during prolonged use.

Product Overview

High-Leverage Combination Pliers

These high-leverage combination pliers are engineered for professional-grade performance in demanding environments. Featuring precision-machined jaws and hardened cutting edges, they provide a reliable grip and efficient cutting capability across various materials. Designed with ergonomic handles, these pliers minimize hand fatigue, making them an essential tool for electrical, construction, and general maintenance tasks.

Key Features

Key Benefits

- Hardened cutting edges for durability
- Ergonomic handle design for reduced fatigue
- Precision-machined jaws for superior grip
- High-leverage design for efficient cutting

Applications

Suitable Applications

Electrical Work, Construction, General Maintenance
