

High-Lift Farm Jack

This high-lift farm jack is designed for lifting, pushing, pulling, winching, and clamping. It is ideal for off-road recovery, farm use, construction, and automotive applications.

Overview

Versatile High-Lift Farm Jack

This high-lift farm jack is engineered for demanding lifting, pushing, pulling, winching, and clamping tasks. Designed with robust steel construction, it ensures durability and reliability for off-road recovery, agricultural, construction, and automotive applications. The unit features adjustable height settings and an integrated safety mechanism to prevent overloading, providing stable support even in challenging environments.

Key Features

Core Functions

- Lifting
- Pushing
- Pulling
- Winching
- Clamping

Primary Applications

Off-road recovery, Farm use, Construction, Automotive

Safety & Design

Safety Mechanisms

Overload Protection • Stable Support Design

Build Material

Robust Steel
