

# High-Lift Water Pump for Irrigation

This high-lift pump is designed for efficient water transfer and irrigation. It features a robust engine with a displacement of 196cc, providing reliable power for demanding applications.

## ADDITIONAL IMAGES

## Overview

### High-Performance Irrigation Solution

This high-lift centrifugal pump is engineered for efficient water transfer in demanding agricultural and construction environments. Utilizing a powerful 196cc engine with OHV technology, it delivers reliable pressure and flow rates for drainage, irrigation, and general water supply tasks. The unit is housed in a robust, protective frame designed for both durability and easy on-site transportation.

## Technical Specifications

### Engine Technology

OHV • Pleasant Start

### Engine Displacement

196 cc

### Suitable Applications

Irrigation, Drainage, Water Supply, Construction

## Performance

### Key Performance Metrics

**196 cc**

Engine Displacement

## Design & Build

### Construction Features

- Protective frame for durability
- Portable design
- High-speed centrifugal mechanism
