

# High-Performance Alkaline D Battery

This high-performance alkaline D battery is designed for a variety of power-hungry devices. It delivers long-lasting and reliable power, making it ideal for flashlights, radios, and other household electronics.

## Product Overview

### High-Performance Alkaline D Battery

This high-performance alkaline D battery is engineered to deliver consistent and reliable power for demanding, high-drain devices. Designed with robust construction, it ensures excellent leak resistance and an extended shelf life for long-term storage. With a stable 1.5V output and a substantial 12000 mAh capacity, it provides dependable energy for professional and household electronics.

## Technical Specifications

### Nominal Capacity

**12000 mAh**  
Capacity

### Nominal Voltage

1.5 V

### Operating Temperature Range

-20°C to 54°C

## Features

### Key Features

- High-drain device compatibility
- Leak-resistant construction
- Extended shelf life
- Stable power output

### Ideal Applications

Flashlights, Radios, Household Electronics
