

High-Performance Auto Engine

This high-performance auto engine is designed for various applications. It features robust construction and efficient combustion for optimal power and fuel economy.

Overview

High-Performance Engine Solution

This high-performance auto engine is engineered for versatility and reliability across various automotive applications. Featuring a robust cylinder block and precision-engineered pistons, it delivers optimal power output while maintaining fuel efficiency. The integrated high-flow intake system ensures consistent performance, making it a dependable choice for demanding operational requirements.

Technical Specifications

Power Output

5.5 HP

Horsepower

Safety Compliance

WARNING

Model Designation

GP160

Key Features

Durable cylinder block, Precision-engineered pistons, High-flow intake system, Electronic ignition
