

High-Performance Brake Lining with Drilled Holes

This high-performance brake lining is designed for superior braking performance and durability. It features drilled holes for enhanced heat dissipation and reduced brake fade, ensuring reliable stopping power in various driving conditions.

Product Overview

High-Performance Brake Lining

These brake linings are engineered for superior braking performance and durability in heavy-duty applications. Designed with precision-drilled holes, they offer enhanced heat dissipation and reduced brake fade for consistent stopping power. The materials are formulated to provide long service life while maintaining low noise levels and minimal dust generation.

Performance & Features

Key Benefits

- Long service life
- Low dust generation
- Low noise operation
- Enhanced heat dissipation via drilled holes

Certifications

ECE-R90

Applications

Suitable Applications

- Commercial vehicles
- Trucks
- Tractors
- Agricultural machinery

Manufacturing & Customization

Customization

Yes

Service Details

Capable of developing new brake pads based on customer-provided samples or engineering drawings.
