

High-Performance Brake Pad

This brake pad is designed for optimal stopping power and durability. Its advanced friction materials ensure consistent performance across various temperatures and driving conditions.

Product Overview

High-Performance Engineering

This high-performance brake pad is designed to deliver optimal stopping power and exceptional durability. Engineered with advanced friction materials, it ensures consistent performance across a wide range of temperatures and demanding driving conditions. The design focuses on minimizing noise and vibration, providing a smooth and quiet braking experience for the operator.

Technical Details

Part Number	3501 115 013
Secondary ID	070801

Features

Key Features	Advanced Friction Material, Noise Reduction, Vibration Damping, Wear Indicator Included
--------------	---

Performance Metrics

Performance Highlights

1 High Temperature Stability	1 Low Noise Level
--	-----------------------------
