

High-Performance Bulletproof Laminated Glass

This bulletproof glass is constructed with multiple layers of glass and PVB film. The laminated glass provides exceptional resistance against ballistic impacts.

Nanjing Fortune-lit

Product Overview

High-Performance Security Glass

This high-performance bulletproof laminated glass is engineered for maximum security and ballistic protection. Constructed using multiple layers of glass and advanced PVB film, it provides exceptional resistance against ballistic impacts while maintaining superior optical clarity. It is an ideal solution for high-risk facilities, including banks and embassies, where both structural integrity and durability are paramount.

Construction & Materials

Construction Type	Laminated Glass
Interlayer Material	PVB Film

Key Features

Security Features	Bulletproof, Ballistic Resistant, High Impact Resistance
-------------------	--

Applications

Recommended Applications

- Banks
- Embassies
- High-risk facilities
- Security checkpoints
