

High-Performance Car Brake Pads

These high-performance car brake pads ensure optimal stopping power and durability. They provide consistent braking performance in various driving conditions and include wear indicators for timely replacement.

Product Overview

High-Performance Braking Solution

These high-performance car brake pads are engineered for optimal stopping power and exceptional durability. Designed to maintain consistent braking performance across various driving conditions, they feature robust friction material securely bonded to a steel backing plate. Each set is equipped with integrated wear indicators to ensure timely replacement and maintain vehicle safety.

Technical Specifications

Part Number	PB518
Production Batch Date	2012-03-28

Features

Kit Contents

- 2 x Brake Pads
- Integrated Wear Indicators

Key Features	High-Performance, Wear Indicators, Consistent Braking, Durable Construction
