

High-Performance Clutch Assembly

This high-performance clutch assembly is designed for optimal power transfer and durability. It features a robust construction with multiple friction plates for enhanced grip and heat dissipation.

Overview

High-Performance Clutch Assembly

This high-performance clutch assembly is engineered for optimal power transfer and exceptional durability in demanding environments. Featuring a robust construction with multiple friction plates, it ensures superior grip and efficient heat dissipation during operation. The precision-engineered clutch basket promotes smooth engagement and significantly reduces wear, making it an ideal solution for racing and high-performance street vehicle applications.

Technical Specifications

Key Performance Features

- Multiple friction plates for enhanced grip
- Optimized heat dissipation design
- Precision-engineered clutch basket
- Smooth engagement mechanism

Durability Focus

Reduced Wear • Robust Construction

Application Suitability

Racing, High-Performance Street Vehicles
