

High-Performance Digital TV Antenna

This high-performance antenna is designed for optimal signal reception. Its durable, weather-resistant construction ensures long-lasting outdoor use and easy installation.

Product Overview

High-Performance Digital TV Antenna

This high-performance digital TV antenna is engineered for optimal signal reception, utilizing a multi-element array that includes a reflector, driven element, and directors. Constructed with durable, weather-resistant materials, it is built to withstand wind and sunshine while maintaining signal integrity. Its sophisticated design ensures an easy installation process, making it a reliable solution for improving digital television image resolution and reception quality.

Key Features

Durability & Construction	Weather-resistant, Wind-resistant, Sun-resistant, Durable materials, Complete seal
Installation	Yes

Technical Specifications

Signal Amplification

1 Low-noise microwave

Amplifier Type

Design Features

- Streamlined shape
- Multi-element array (reflector, driven element, directors)
- Sophisticated unity design

Certifications

Patented Design
