

High-Performance InfiniBand Cable

This InfiniBand cable is ideal for data center and high-performance computing applications. It provides high bandwidth, low latency, and reliable data transfer for InfiniBand-compatible devices.

Product Overview

High-Performance InfiniBand Connectivity

This high-performance InfiniBand cable is engineered specifically for demanding data center and high-performance computing (HPC) environments. It delivers exceptional bandwidth and ultra-low latency, ensuring reliable, high-speed data transfer across your critical network infrastructure. Designed for seamless integration with servers, storage systems, and network switches, this cable is built with premium materials to maintain superior signal integrity and long-term durability.

Technical Specifications

Compatible Devices

- Servers
- Storage Systems
- Network Switches

Primary Application

Data Center, High-Performance Computing, Networking

Performance Metrics

Key Performance Attributes

1 Low

Latency

1 High

Bandwidth
