

High-Performance Intercooler for Enhanced Engine Cooling

This high-performance intercooler reduces the temperature of compressed air, enhancing engine efficiency and power. It is constructed with durable materials, featuring an optimized core design for minimal pressure drop and maximum cooling capacity.

Overview

High-Performance Engine Cooling

This high-performance intercooler is engineered to significantly enhance engine efficiency by effectively reducing the temperature of compressed air from the turbocharger. Designed for optimal heat dissipation and minimal pressure drop, it ensures consistent performance under demanding conditions. Its robust construction makes it an ideal upgrade for both street and track applications, contributing to improved combustion and increased horsepower.

Vehicle Compatibility

Compatible Model	NISSAN Juke L4 1.6L
Model Years	2011-2012

Technical Specifications

Core Dimensions	280 x 185.56 mm
Tank Dimensions	95.5/95.5 x 189.5 mm

Cross Reference

Industry Standard Codes

Reference Type	Code
DPI	4401-2300
Nissens	56259
Internal ID	56259
OEM Reference	14461-1KC0A, 14461-1KC0B
