

High-Performance Rolling Bearing

This high-performance rolling bearing is designed for demanding applications. It features precise boundary dimensions and high basic load ratings.

Product Overview

High-Performance Rolling Bearing

This high-performance rolling bearing is engineered for demanding industrial applications requiring extreme reliability and durability. Featuring precise boundary dimensions and elevated basic load ratings, it is optimized for heavy-duty machinery. The design ensures consistent performance and structural integrity under significant load conditions.

Technical Specifications

Key Performance Metrics

3372 KN

Max Dynamic Load

9440 KN

Max Static Load

Model Specifications

Model	d (mm)	D (mm)	Weight (kg)
SBNN450A	450	580	137.5
SBNN630B	630	820	443.7
SBNN650A	650	820	443.1
SBNN700A	700	870	507.4
SBNN750A	750	960	606.6
