Product Overview

High-Performance Irrigation Solution

This high-performance water pump is engineered for demanding agricultural and industrial applications, providing consistent pressure for irrigation, sprinkling, and cooling systems. Built with a durable stainless steel body and an integrated pressure tank, it ensures reliable water transfer and long-term operational stability. It is the ideal choice for modern aquafarms and industrial washing facilities requiring a robust and efficient pumping solution.

Applications

Suitable Applications

Pressure Boosting, Water Supply, Sprinkling, Cooling Systems, Industrial Washing, Aquafarms

Key Features

Build Quality

- Durable stainless steel pump body
- Integrated pressure tank for consistent output
- Powerful motor for reliable performance

Operational Advantages

High Efficiency • Consistent Pressure • Industrial Grade
