Product Overview

High-Performance LED Illumination

This high-power LED lamp utilizes advanced chip import and automatic packaging technology to deliver superior brightness, stability, and light quality. Engineered with a high-quality aluminum heat sink, it ensures effective thermal management for extended operational life. Designed for seamless compatibility, it serves as a direct, energy-efficient replacement for traditional lighting solutions.

Technical Specifications

Drive Type	DC Drive
Heat Sink Material	High-quality aluminum
Key Features	No Noise, No Flash, High Stability, High Light Efficiency

Applications

Recommended Applications

- Hotels
- Shopping Malls
- Showcase Lighting
- Entertainment Venues
- Home Lighting
