

High-Power LED T-Bulb

This high-power LED T-bulb is designed for efficient and long-lasting illumination. It features a robust heat sink for optimal thermal management and emits a bright, uniform light distribution suitable for various applications.

Product Overview

High-Performance T-Bulb Lighting Solution

These professional-grade LED T-bulbs are engineered for high-intensity, uniform illumination across various indoor and outdoor environments. Constructed with high-quality aluminum die-casting, they incorporate robust heat sinks to ensure exceptional thermal management and extended operational lifespan. They are designed for easy installation via standard base compatibility and deliver significant energy savings compared to traditional industrial lighting.

Technical Specifications

Technical Comparison Table

| Model | Power | Lumen | Size (mm) |
|-------|-------|-------|--------------|
| T80 | 20 | 1600 | Ø81*151 |
| T100 | 30 | 2400 | Ø100.9*182.8 |
| T120 | 40 | 3200 | Ø118.6*210.3 |
| T140 | 50 | 4000 | Ø138.7*228.8 |
| T140L | 70 | 5600 | Ø138.5*239.5 |
| T150 | 80 | 6400 | Ø149*259.9 |
| T160 | 100 | 8000 | Ø160.8*265.8 |

Compatible Bases

E27, E40

Voltage Range

100-250V / 175-250V

Product Features

Core Advantages

- Robust aluminum die-casting construction
- Advanced heat sink for thermal management
- High-efficiency energy saving performance
- Uniform light distribution
