

# High-Power Metal Cut-Off Machine

This metal cut-off machine features a high-power motor and an increased base for enhanced stability. The cast iron body and base ensure durability, while integrated wheels allow for easy mobility.

## Product Overview

### High-Performance Cutting Solution

The J3GH-400/J3GI-400 cutting machine is a robust and versatile tool designed for precision cutting of various materials. Featuring a powerful motor and a durable cutting wheel, it ensures efficient and clean cuts. The machine is equipped with a sturdy, increased base and wheels for stability and easy maneuverability, making it ideal for industrial and workshop applications.

## Technical Specifications

Model Variants	J3GH-400, J3GI-400
Motor Power	High-power

## Design & Build

Base Construction	Increased, reinforced base
Mobility	Yes

## Safety & Ergonomics

### Safety Features

- Protective guard
- Ergonomic handle
- Stable base
