

High-Precision Embroidery Machine

This high-precision embroidery machine is designed for intricate and detailed fabric decoration. It features multiple needle positions, automated thread tension control, and a user-friendly interface for pattern customization.

Overview

High-Precision Embroidery Solution

This high-precision embroidery machine is engineered for intricate and detailed fabric decoration, making it an ideal choice for industrial-scale production. It features advanced automated thread tension control and multiple needle positions, allowing for diverse color applications and complex design creation. With a user-friendly interface for pattern customization, this equipment combines reliability with high efficiency for various textile materials.

Technical Specifications

Application Suitability

Industrial-Scale Production • Intricate Fabric Decoration • Complex Design Creation

Needle Positions	Multiple
Automation Features	Automated Thread Tension Control, Pattern Customization Interface
