

High Pressure Air Compressor with Fan Cooling

This high-pressure air compressor is equipped with a fan cooling system. The fan cooling system ensures efficient heat dissipation, maintaining optimal performance and extending the lifespan of the compressor.

Overview

Industrial High-Pressure Performance

The FH1040 High-Pressure Air Compressor is engineered for demanding industrial applications that require consistent and reliable high-pressure air delivery. Featuring an integrated fan cooling system, this unit ensures efficient heat dissipation during operation, which helps maintain optimal performance levels and extends the overall lifespan of the compressor. It is a robust solution designed to meet the rigorous needs of professional environments.

Technical Specifications

Cooling System

Fan Cooling

Model Number

FH1040

Primary Application

Industrial, High-Pressure
