

High Pressure Anti-Wear Hydraulic Oil

This hydraulic oil is designed for high-pressure hydraulic systems found in engineering, construction, and mining applications. It is suitable for equipment such as cement pump trucks and other construction machinery.

Product Overview

High-Pressure Anti-Wear Performance

This premium anti-wear hydraulic oil is formulated with high-quality hydrogenated base oil and advanced additives to ensure long-term performance. It provides excellent fluidity, oxidation stability, and shear stability, making it ideal for demanding high-pressure, high-speed hydraulic systems. By maintaining superior cleanliness, this oil effectively protects equipment and extends its operational service life.

Technical Specifications

Available Packaging

- 3.5L
- 4L
- 16L
- 18L

Performance Features

High-Pressure Resistant • Excellent Filtration • Oxidation Stable • Shear Stable • Extended Service Life

Viscosity Levels

L-HM 32, L-HM 46, L-HM 68
