

High Pressure Bicycle Floor Pump with Gauge

This bicycle floor pump is designed for efficient and durable inflation of bicycle tires. It features a steel barrel and base, an oversized barrel for fast inflation, and a twin head hose compatible with both Presta and Schrader valves.

Product Overview

High-Performance Inflation Solution

This high-pressure floor pump is engineered for efficient and reliable bicycle tire inflation. Built with a robust steel barrel and a wide, stable base, it is designed to withstand frequent use in demanding environments. The oversized 32mm barrel facilitates rapid inflation, while the integrated, easy-to-read gauge ensures precise pressure control for optimal performance.

Technical Specifications

Maximum Pressure

200 psi

Max Pressure (PSI)

13.6 bar

Max Pressure (Bar)

Barrel Diameter	32 mm
Gauge Diameter	60 mm

Compatibility & Features

Included Accessories

- Ball needle
- Air bladder needle

Valve Compatibility	Presta, Schrader
---------------------	------------------

Design & Build

Construction Materials

Steel Barrel • Steel Base

Ergonomic Features

- Ergonomic handle
- Wide base for stability
- Low-mount gauge for easy viewing
- Thumb lock lever for airtight seal
