

High-Pressure Borehole Hose

This borehole hose features high tensile strength and abrasion resistance. It is suitable for various industrial and agricultural settings, including underground mining applications.

Overview

High-Pressure Borehole Hose

This high-pressure borehole hose is engineered for demanding water retrieval and de-watering projects, including municipal water supply, mining, and industrial applications. Constructed with a PU-covered lining and a high-tenacity synthetic reinforcement jacket, it offers excellent durability and performance. The hose is designed for efficient handling in various ground water projects, featuring a smooth cover with integrated straps for secure installation.

Technical Specifications

Available Lengths

- 15m (50ft)
- 30m (100ft)
- 200m (660ft)

Recommended Applications

Mine de-watering, Municipal water supply, Domestic water supply, Test pumping, Industrial bore water retrieval

Temperature Range

-40 to 50

Water PH Range

4 to 9 (below 30), 5 to 9 (30 to 50)

Performance Data

Size and Performance Matrix

Size (in)	I.D. (mm)	Burst Pressure (bar)	Tensile Strength (Tonne)	Weight (kg/m)
1 1/2"	40	52	2.7	0.3
2"	51	58	4	0.6
3"	76	58	9	0.9
4"	102	52	12.5	1.5
5"	127	50	17	2.1
6"	152	44	20	2.5
8"	200	42	27	3.4
